Macbook Pro

It's faster and more powerful than before, yet remarkably thinner and lighter. It has the brightest, most colorful Mac notebook display ever. And it introduces the Touch Bar — a Multi-Touch enabled strip of glass built into the keyboard for instant access to the tools you want, right when you want them. The new MacBook Pro is built on groundbreaking ideas. And it's ready for yours.

iMac Pro (2017)

Pros love iMac. So when they asked us to build them a killer iMac, we went all in. And then we went way, way beyond, creating an iMac packed with the most staggeringly powerful collection of workstation-class graphics, processors, storage, memory, and I/O of any Mac ever. And we did it without adding a millimeter to its iconic all-in-one design. So everyone from video editors to 3D animators to musicians to software developers to scientists can do what they do like they've never done before. Introducing iMac Pro. A lean, mean dream machine.

iPad (2018)

If the computer were invented today, what would it look like? It would be powerful enough for any task. So mobile you could take it everywhere. And so intuitive you could use it any way you wanted — with touch, a keyboard, or even a pencil.¹ In other words, it wouldn't really be a "computer." It would be the new iPad.

EarPods

Unlike traditional, circular earbuds, the design of the EarPods is defined by the geometry of the ear. Which makes them more comfortable for more people than any other earbud-style headphones. The speakers inside the EarPods have been engineered to maximize sound output and minimize sound loss, which means you get high-quality audio. The EarPods with Lightning Connector also include a built-in remote that lets you adjust the volume, control the playback of music and video, and answer or end calls with a pinch of the cord.

iPad mini Smart Covers

The newly designed Smart Cover for iPad mini 4 is constructed from a single piece of polyurethane to protect the front of your device. The Smart Cover automatically wakes your iPad when opened and puts it to sleep when closed. It folds into different positions to create a stand for reading, viewing, typing, or making FaceTime calls. And it's easy to remove, so you can snap it on and off whenever you want.
